

## Statement on the Release of the Swarm Aero NDAs with Fayetteville Officials

The NWA Democratic Socialists of America are appalled by the City of Fayetteville government after the release of the NDAs that were signed with Swarm Aero. These signed agreements show us that the city officials knew the extent of the Swarm Aero products that are being created and how they will affect innocent people around the world. The complicity of the signing council members, mayor Molly Rawn's office, and the one who approved their signing according to the information gathered in a recent FOIA request, assistant city attorney Blake Pennington.

These officials not only signed controversial documents, but defended their decision on this at the expense of the people of Fayetteville. Every killer drone that leaves the Swarm Aero building will ensure the death of innocent civilians and show how technology is being used for genocide across the world. We condemn the officials involved and say to them, the blood of innocent lives will be on your hands and you have no one to blame but yourselves. Your representation of the city will cause a shift in how we are viewed, not as a stable and better city in Arkansas, but an oppressive government that signs their will for the death of innocent people.
